“The Art of Life Enhancement” with Carla van Laar (7th & 8th)

These workshops flow from one another to create a layered understanding of art based on the processes within:

- Experiential ‘bottom up’
- Interpersonal trauma informed
- And discursive approaches to healing, wellbeing, self-care and therapy.

Participants can expect to gain:

- Practical and sensitive understandings of using materials and art-based processes within a holistic approach to wellbeing
- A greater range of micro skills in attending to self and other, expanded access to your innate emotional intelligence, and how to use your visual imagination in listening for existential images that facilitate interpersonal connection in your work with others.
- Renewed senses of purpose and meaning in the ripple effects of your work as contributing to intergenerational, cultural, transpersonal, ecological and universal healing, empowerment and creativity.

SYSTEMIC/FAMILY CONSTELLATIONS with Jonine Lee Gabay (10th & 11th)

“The Knowing Field has been a phenomenon of Family Constellations that is difficult to understand. The term “Knowing field” seems to be the most appropriate term for describing the field phenomena which forms on and in the representatives and guides the process to a resolution and an acceptance of “what is”.

“On the one hand, it can be seen as a poetic term, poetry being the most accurate language at the level of the soul. On the other hand, “Knowing field” is inspired by Rupert Sheldrake’s findings on morphogenic fields and the extended mind, as well as quantum physics and its surprising discoveries regarding the transmission of information and knowledge through quantum fields”
